
Draining base

Perforated base : 40mm holes.
Excess water drains off underneath the container.

Allows good drainage of rainwater and after watering: the ideal solution for your exterior containers.

For exterior use only.

€ 0

Water reservoir with Horticultural system

Allows the creation of a water reservoir integrated in the drainage section.
Overflow drainage underneath the container.

For a reservoir free from the risk of frost.

Provide the option Horticultural system : IOP-SH or IOP-SH40 or IOP-SH60.

acc. to capacity and format : from € 20 excl. tax/planter

Drainage via weep hole

Watertight base with overflow drainage via a weep hole on one side of the container.
Can be connected to a rainwater system.

Ideal when water drainage is not possible underneath the container. Allows overflow drainage from a specific point. Possibility of reservoir with IOP-SH.

Evacuation by weep hole on one side can form dirt on the planter over time. Less durable solution than a draining base (risk of becoming clogged over time).

IOP-BARB : € 40
Excl tax/ Planter (without reservoir)
With reservoir add IOP-SH

Watertight base

Watertight base for "Indoor" container.
Requires IOP-ER option : Reinforced sealing.

Control watering using the Water Level Indicator option "IOP-INE".

Recommended for interior use only.

IOP-ER : € 30 - 50
Excl tax/ Container
acc. to size of container

Open base

Wide openwork bottom to allow exchanges with the soil.

Ideal for raised bad garden.

IOP-FO : € 20
Excl tax/ Planter
